Tuberculosis Screening Form

10A NCAC 09 .0701 (a) (Centers); .1702 (b)(4) and .1729 (a)(5) & (b) (Family Child Care Homes)

This questionnaire must be administered to all child care providers, by a licensed health care professional, before coming into contact with children. Directors, operators, additional caregivers, substitutes, and individuals who volunteer more than once a week must be screened. Testing should only be performed if the individual answers "yes" to one of the screening questions. Both screening and testing are available at the local health department.

Note to health care professionals: A negative risk and symptom screen should be considered a negative tuberculosis test in such individuals, and no further testing is required. An Interferon Gamma Release Assay is preferred over a tuberculin skin test for otherwise low-risk individuals with a positive response to the risk or symptom screening questionnaires. (See page 2.)
